

# Integra-GS

carrier-grade microwave radio,  
delivering up to 1Gbps Full Duplex

- SAF Tehnika most powerful modem yet with 3.5MHz to 60MHz channel bandwidth and up to 2048QAM modulation support for universal network upgrades in a compact, single hardware design.
- Full outdoor unit includes radio, modem, Ethernet network processor, and PoE splitter with surge arrestor.
- SFP ports for easy installation – choose single-mode or multi-mode fibre by changing SFP's, add fibre optic cabling later.
- Advanced Ethernet network processor features AES encryption, efficient header compression, advanced Quality of Service, and MEF compliant functionality.
- Built-in protected 2+0 layer 1 link bonding provides double capacity up to 982 Mbps and up to 1Gbps with header compression.

Integra-GS is an unbelievably light, energy efficient carrier-grade system that exemplifies an outstanding return on smart engineering - the synergy of high competence in radio electronics and materials science. Slip-fit design allows integration with existing high performance antenna systems or integration with 2+0 aggregation setups for up to 982Mbps Full Duplex capacity without header compression. Gigabit Power over Ethernet (PoE) port defines simple installation, while dual SFP slots enable fibre optic installation – giving the user ultimate flexibility in cable design.
